Unmanaged PoE Switch with 10 ports - Eight high-power RJ45 PoE+ ports and two 10/100/1000 Mbps uplinks

The Intellinet Network Solutions 10-Port PoE+ Switch with 8 Gigabit Ethernet Ports and 2 RJ45 Gigabit Uplink Ports passes both data and electrical power to PoE-compatible devices via standard Cat5e or Cat6 network cables. Equipped with eight Gigabit Ethernet ports, this switch can power wireless LAN access points and bridges, VoIP phones, IP video cameras and more while delivering network speeds up to 1,000 Mbps.

Power over Ethernet 802.3at

This high-powered PoE switch supports the IEEE 802.3at protocol and can inject up to 30 watts of power per port. IEEE802.3af- or IEEE802.3at-compliant devices attached to the switch need no additional power, helping to avoid the time and expense of electrical rewiring and minimizing the unsightly clutter of power supplies and adapters on ceilings and walls. Any mix of PoE and non-PoE devices is supported, and thanks to its short-circuit, overload and high-voltage protection function, your equipment is well-protected. For devices that are not 802.3at/af compliant (legacy wireless access points or network cameras), we suggest the use of an Intellinet Network Solutions PoE/PoE+ Splitter.

Gigabit Uplinks

This switch is equipped with two Gigabit RJ45 ports, which are ideal for connecting the switch to the network's backbone, a server or your video recording solution (NVR). The resulting PoE switch network can comfortably

handle your power and data needs in an immediate area while providing the necessary link to a core network.
