EAN-13: 0766623716352 | UPC: 766623716352

2U Vertical Wall Mount Rack Bracket for 19in. for Network and Server Equipment

This 19" Vertical Wall Mount Rack Bracket offers a reliable rackmount solution for IT and AV equipment in home offices and small businesses where space limitations prevent conventional racking. Mount your network equipment, such as PDUs, switches, and patch panels, with a smaller footprint by hanging it flush against the wall. Alternatively, you can install it horizontally beneath a desk, providing convenient access to the installed equipment directly from your workspace.

Constructed with a heavy-duty cold-rolled sturdy steel adhering to EIA-310 19in rack standards, this wall-mount bracket is perfect for environments lacking the footprint space for a full-size server equipment rack. Wall-mounting holes spaced 16 inches apart match standard wall-stud placement. The bracket supports equipment up to a maximum weight of 135 lbs. (61 kg) with good airflow through its open design.

Features:

- Allows space-saving vertical rackmount installations ideal for network equipment like patch panels, PDUs, switches, and more
- Mountable flush with the wall, great for network areas with limited floor space (wall-mounting hardware included)
- Open frame for good airflow and easy access to equipment and cabling
- Maximum load capacity of 135 lbs. (61 kg)
